Web Index with over 9 million websites

The number of websites indexed by our web crawlers recently exceeded 7.5 million, mainly from German-speaking countries.

This means that the milestone of 8 million indexed websites is not far away.

The first ultimate goal is 14 million indexed websites. Increasing the index will significantly improve the search results. The semantic search delivers better results.
SearchThis is the only search engine in which you can search filtered by country or worldwide. You can also see how many websites have been indexed per country.
